

Subhan Saadat Khan

Hauptstraße 87, 91054 Erlangen, Bavaria

+49-15124814197 | subhansaadat@gmail.com | [LinkedIn](#) | [GitHub](#)

Objective

Software Developer with a strong foundation in backend and full-stack development, now specializing in AI/ML through a Master's in Data Science. Passionate about building intelligent, data-driven solutions and leveraging algorithms, data modeling, and predictive analytics to solve real-world problems. Seeking opportunities to bridge software engineering with AI and machine learning applications.

Education

Friedrich-Alexander-Universität (FAU) <i>Master's in Data Science (AI & ML)</i>	Oct 2024 – Present <i>Erlangen, Germany</i>
Monash University <i>Bachelors of Computer Science</i>	Feb 2021 – Oct 2023 <i>Subang Jaya, Malaysia</i>
Courseworks: • Data Structures • Data Analysis • Object-Oriented Design • Data Science • Software Architecture • Databases • Programming Paradigms • Mobile App Development	

Technical Skills

- Programming Languages:** Java, JavaScript, TypeScript, Python, R, C, C++, HTML/CSS, SQL
- Frameworks & Technologies:** LangChain, React.js, Node.js, Vue.js, Angular, Django, Flask, ASP.NET Core, Frappe
- Databases:** PostgreSQL, SQL, Google Firebase
- Data & Analytics:** Microsoft Power BI, Tableau, Pandas, SAS, Machine Learning, MS Office (Excel)
- Tools & Platforms:** VS Code, Docker, Git, GitHub, Scrum, Android Studio, RStudio, PyCharm, Visual Studio, Anaconda, Jupyter Notebook, ERPNext

Experience

ParaLogic <i>Python Web Developer</i>	Jan 2024 – Sept 2024 <i>Karachi, Pakistan</i>
• Developed automation solutions within the ERPNext framework, improving operational efficiency • Automated AI-driven data synchronization via third-party APIs, reducing manual data entry by 25% and minimizing errors. • Implemented financial automation processes in ERPNext, streamlining cost calculations, tax adjustments, and payment processing, cutting accounting discrepancies by 30%. • Enhanced inventory and order tracking by integrating dynamic filtering, reducing processing time by 20%. • Optimized database queries and report generation, improving response times for financial and production data by 40%. • Collaborated with cross-functional teams (finance, production) to align software solutions with digital initiatives.	
Tong Hin <i>Software Development Intern</i>	Nov 2022 – Feb 2023 <i>Subang Jaya, Malaysia</i>
• Developed a robust RESTful API using ASP.NET Core for Retail Orders, enabling efficient interaction between the UI and database in line with company protocols. • Designed a user-friendly Prism Framework interface to display Movement History of items with dynamic filtering, boosting productivity and reducing data errors by 20%. • Created a comprehensive ERD (Entity Relationship Diagram) based on business requirements, ensuring accurate data modeling and system scalability. • Wrote and integrated Web API services, ensuring efficient communication between the frontend and backend systems. • Conducted thorough unit and API testing, improving feature quality and minimizing bugs by 30%, ensuring stable and reliable production deployment.	

UReview

Full-Stack Developer

Jun 2021 – Jul 2022

Subang Jaya, Malaysia

- Led Angular front-end and database development for a Django web app, ensuring smooth performance and user experience.
- Optimized query response time by 30%, improving speed and efficiency.
- Implemented real-time automation for feedback submission using Vue.js, boosting user engagement.
- Collaborated with the design team to create a responsive UI for seamless cross-device usability.
- Conducted code reviews and participated in sprint planning, ensuring high-quality and timely feature delivery.
- Proactively identified areas for performance improvement, implementing solutions that reduced load times by 25%.

University Projects

Deep Learning | *Python, TensorFlow, Keras (Neural Networks)*

- Developed various neural network architectures, including Convolutional Neural Networks (CNNs), Recurrent Neural Networks (RNNs), and deep generative models, with a focus on diverse training strategies for optimal performance.
- Designed and implemented advanced image classification models, achieving high accuracy in identifying and categorizing complex image datasets.
- Conducted hyperparameter tuning and model optimization to enhance the performance and efficiency of deep learning models.

9 Men Morris Game | *Java, Object-Oriented Design (Game Development)*

- Developed a 9 Men Morris game in Java using OOD principles, with a tutorial mode and dynamic hint system.
- Integrated ComputerPlayer class following SOLID principles for AI-driven Player vs Computer functionality.
- Implemented legal move highlighting and automated hints for enhanced UX and intuitive gameplay.

Loan Default Prediction | *Python, scikit-learn (Machine Learning)*

- Analyzed loan data in Python, identifying patterns between credit scores, interest rates, and loan repayment.
- Built Decision Tree and Random Forest classifiers in scikit-learn, achieving 85% accuracy.
- Evaluated models using accuracy scores and confusion matrix to determine the best predictor.

Movie Library | *Java, SQLite, XML (Android Development)*

- Designed a dynamic movie catalog in Java using RecyclerView & ListView, enabling smooth browsing and quick access to movie details.
- Implemented a SQLite database to store and manage user movie collections, ensuring offline accessibility.
- Designed an XML-based UI and optimized performance using lazy loading techniques, reducing initial load time and enhancing scrolling efficiency for large movie lists.

Extracurricular Activities

Monash University Student Association

Vice Captain of House Manticore, Monash Cup 2023

Jul 2021 – Nov 2023

Subang Jaya, Malaysia

- Led House Manticore in Monash Cup 2023, the university's largest sporting event.
- Active participant in Monash Tech Club, Monash Student Association, and Monash Investment Group.

TeaMWork Internship Program

Monash Warwick Alliance

Jun 2023 – Jul 2023

Virtual Internship

- Conducted market research and implemented strategies for PT Analis Keamanan Siber, an Indonesian cybersecurity operations company.
- Produced a final report and infographic released to the Indonesian public, contributing to cybersecurity awareness.
